

Custom Afghans & Tapestries

How To Design Your Custom Afghan

Take or gather photographs and/or drawings of the subjects you want to be included on your custom Afghan. Remember, the angle in your photograph, is the angle the artist will draw. The artist cannot draw something they cannot see. Try to limit your items to no more than nine (9), so that our computer department will have room to add detail, i.e., shadows and clouds. Too many items on a single afghan has a tendency to crowd the overall look of the design and results in a loss of detail.

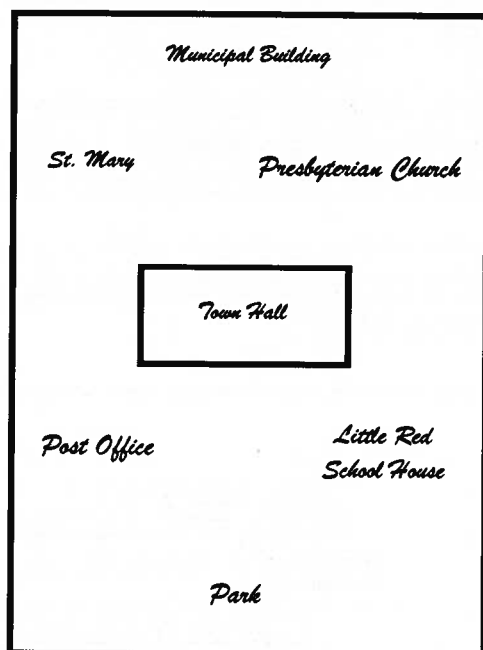

Special Note:

If you have a long building that will not fit into a single photo, please obtain a disposable panoramic-view camera. They are easy to use, inexpensive and will get much better results.

What Do I Need To Send?

When you have gathered all of the subject matter, decide which item you would like to use for the center, or focal point, of your design. Our art department will design your afghan or you may sketch out a rough draft of your layout ideas, along with a note of instructions, and submit them to our art department.

Please include the following information:

1) Pictures and Wording.

Please mark your pictures with building names and dates if desired.

2) Vertical or horizontal layout?

If you have a preference, please let us know. Otherwise, our art staff will decide which will work best with your design.

3) Borders

If you would like a border on your afghan, we have many standard designs available, or we can design a new one, specifically for your afghan.

4) Call your Keystone Specialties

Representative at 1-800-240-8639 to help you get started.
